

Job Description – Java Developer (3–5 Yrs Experience)

Position Title

Java Developer

Department

Technology / Software Development

Location

Pune / Hybrid / Remote (as applicable)

Employment Type

Full-Time

Experience Required

3–5 Years

About the Role

We are looking for a skilled and passionate Java Developer with 3–5 years of hands-on experience in designing, developing, and maintaining scalable enterprise applications. The ideal candidate should possess strong backend development expertise, problem-solving abilities, and experience working in agile environments.

The candidate will work closely with cross-functional teams including product managers, QA engineers, UI/UX teams, and DevOps to build high-performance applications and deliver quality software solutions.

Key Responsibilities

- Design, develop, test, and maintain Java-based applications.
- Write clean, scalable, and efficient code following coding standards and best practices.
- Develop RESTful APIs and microservices architecture-based solutions.
- Collaborate with front-end developers and integrate user-facing elements with server-side logic.
- Participate in software design discussions and technical architecture planning.
- Troubleshoot, debug, and enhance existing applications.
- Optimize applications for maximum speed, scalability, and security.
- Perform unit testing and support integration testing activities.

- Work with databases for designing schemas, writing queries, and optimizing performance.
 - Participate in code reviews and mentor junior developers when required.
 - Coordinate with DevOps teams for deployment and release activities.
 - Ensure timely delivery of assigned tasks in agile sprint cycles.
 - Maintain proper technical documentation for development and deployment processes.
-

Required Technical Skills

Core Java

- Strong understanding of Core Java concepts
- OOPs principles
- Collections Framework
- Multithreading
- Exception Handling
- Java 8+ features (Streams, Lambda Expressions)

Frameworks & Technologies

- Spring Framework
- Spring Boot
- Hibernate / JPA
- REST API Development
- Microservices Architecture

Database Knowledge

- MySQL / PostgreSQL / Oracle
- SQL query optimization
- Database design concepts

Tools & Platforms

- Git / GitHub / Bitbucket
- Maven / Gradle
- Jenkins
- Docker (preferred)
- Kubernetes (preferred)

Cloud & DevOps (Preferred)

- AWS / Azure / GCP basics
 - CI/CD pipelines
-

Required Qualifications

- Bachelor's degree in Computer Science, Information Technology, or related field.
 - 3–5 years of professional experience in Java development.
 - Experience working in Agile/Scrum development environments.
 - Strong analytical and problem-solving skills.
 - Excellent communication and teamwork abilities.
-

Preferred Skills

- Experience with Kafka/RabbitMQ
 - Knowledge of Redis or caching mechanisms
 - Exposure to Elasticsearch
 - Understanding of secure coding practices
 - Experience in performance tuning and optimization
 - Exposure to frontend technologies like Angular or React is an added advantage
-

Soft Skills

- Strong communication skills
 - Team collaboration
 - Ownership and accountability
 - Time management
 - Adaptability and willingness to learn
-

Interview Process

1. HR Screening
 2. Technical Assessment
 3. Technical Interview Round
 4. Managerial Discussion
 5. HR Discussion & Offer Release
-

Compensation & Benefits

- Competitive salary package
- Health insurance
- Flexible work environment
- Learning & development opportunities
- Performance-based incentives
- Paid leaves and holidays
